I am a Software Engineer with nearly 1 year of experience in the software industry. First of all, I had a learning process in the field of Back-End and Mobile, as well as in the Front-End field. During this time, I have been developing projects with JavaScript, React, Vue.js,C#, .Net MVC, Dart and MsSQL technology data tools.

I am success- and result-oriented, prone to research, aiming for both myself and professional development, and highly motivated to develop projects and produce new ideas.

By closely following technological developments, I focus on continuous development and improvements in Front-End software processes, which is my primary goal.
